

Name: _____

My Summer Reading & Math Assignments

For students entering Mrs. Sisson's 4th grade class in the fall of 2015

Complete these two tasks over the summer. Return this completed packet during the first week of school (September 3-5)!

Your reading task over the summer is to read 5 books. Did you know that reading just 5 books will help you stay on reading level? It's true! Make the most of it by choosing books that are page turners!

My Summer Book List (title & author):

1. _____
2. _____
3. _____
4. _____
5. _____

Your math task is to practice your computation skills. Do this by completing the 5 attached pages.

Computational fluency is expected! If you need to work on your basic addition, subtraction, multiplication, or division facts, here are two websites you might want to try. This would be in addition to completing your computation pages.
